

LABPRO- Hot Plate

The hot plates we manufacture are appropriate for laboratory heating and sample drying and have a pure ceramic material top that endow with both impact strength and chemical resistance. These plates have reflective white color that increases the visibility and the body which is constructed of rugged aluminum for stability and durability. The variable heat control provides up to 375 W of even heat and is approved by CSA. These are available in 115 V, 50/60 Hz.

LABPRO- Hot Plate energy regulator

The hot plates we manufacture are appropriate for laboratory heating and sample drying and have a pure ceramic material top that endow with both impact strength and chemical resistance. These plates have reflective white color that increases the visibility and the body which is constructed of rugged aluminum for stability and durability. The variable heat control provides up to 375 W of even heat and is approved by CSA. These are available in 115 V, 50/60 Hz.
